A Bluewave Group Company

Enterprise instant messaging and web conferencing

Real-time. Right now

Simply put, every minute you wait you may be missing out on valuable business opportunities. IBM Lotus® Sametime® 7.5.1 software raises the bar in business collaboration and communication.

10 TOP BENEFITS FOR YOUR BUSINESS

- 1 Enhanced productivity**
Free up time for activities that drive value for your organization. One tool for communicating: instant messaging (IM), voice over Internet Protocol (VoIP) or Web conferencing.
- 2 Improved customer satisfaction**
Allow employees to find the information they need from colleagues or vendors quickly and provide immediate answers to urgent questions.
- 3 Powerful security features**
Sametime allows you to unlock new collaboration possibilities without opening your business up to new risks. Capabilities such as encryption and user authentication allow users to verify contacts and exchange sensitive information more safely.
- 4 Enhanced usability and choice**
Tap into the latest, innovative collaboration - including enterprise IM, presence awareness, VoIP, mobile access and Web conferencing features - in one integrated solution.
- 5 Anytime, anywhere communications**
Employees can communicate with outside business contacts using popular public IM services - AOL, Yahoo, Jabber - without compromising the security of internal communications.
- 6 Less travel**
Employees can establish stronger business connections and stay in closer touch with worldwide business contacts without having to travel to meet them face to face.
- 7 A platform, not just a product**
Sametime incorporates a host of business applications, processes and communication methods into a familiar, easy-to-use interface that helps reduce the need to develop new employee skills.
- 8 Unmatched flexibility**
Sametime runs on a wide range of platforms, operating systems and devices - giving you greater choice as you select the optimal technologies to run your business while containing your TCO.
- 9 Better control over communications**
Policy-based administration makes it even easier for IT staff to manage and protect access to - and maintain tighter control over - communications that impact how your organization is represented in the wider business community.
- 10 Proven reliability**
IBM Lotus Sametime software is used by more companies worldwide than any other enterprise IM solution. So you can count on industry-leading IBM technology to help you compete more effectively in your fast-paced work environment.

Take a closer look

IBM Lotus Sametime 7.5.1 is the award-winning and market-leading platform for unified communications and collaboration with choices and features that businesses need to work together in real-time.

From emoticons, rich text, spell check, to automatic chat histories, easy-to-use web conferences and built-in video conferencing, Lotus Sametime 7.5.1 is a beauty to behold.

Whether you need more productive teams, to reduce business travel burdens, or inject unified communications and collaboration into other applications and processes, Lotus Sametime is the right choice for enterprise real-time collaboration.

Tabbed chats

New tabbed chats coupled with the existing rich text, spell check, emoticons and integrated contact information, make it even easier to keep track of your conversations and keep your desktop organized.

Video chats

New point-to-point video allows you can interact with your colleagues on a more personal basis.

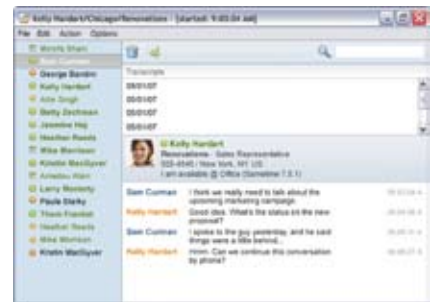

Contact list

You can find your contacts easily through type-ahead search and you get their details through the integrated business card. There is also a Primary Contacts plug-in so your frequent contacts are never more than a click away.

Chat history

You can keep track of conversations with the new features of the chat history viewer, including a built-in chat transcript search and the ability to e-mail transcripts.

Web conference

You can save on travel expenses while keeping teams on the same page and the new edge-to-edge full screen view makes it even easier to do so.

How to get your FREE 30 day Free trial and installation

30 day full trial of Lotus Sametime v7.5 and installed absolutely FREE

To enable your organisation to quickly deploy IBM Lotus Sametime and start to benefit from an enterprise grade instant messaging system, BE Systems are able to offer FREE installation to accompany the FREE licensing available from IBM. BE Systems will install and integrate Sametime into your existing IBM or Microsoft environment and allow you to experience the benefits to your own organisation.

The FREE installation offer includes one day of on-site consultancy from BE Systems to install IBM Lotus Sametime v7.5.1 in conjunction with your existing support teams. The installation will include making available the various Lotus Sametime clients to allow you to deploy these to your users. To ensure that we deploy this successfully, we will need:
An installed and configured server, running with either Windows 2003, Linux or AIX
Support from your OS and AD or Lotus Domino teams
Access to your corporate Lotus Notes or Active Directory environment
Access to two test PCs to deploy the clients to
For point to point video and web conferencing - webcams and PC headsets for each trial user

BE Systems will then walk your teams through an installation of IBM Lotus Sametime and show you how to manage the trial. We'll also show you how to deploy the client to new users and how to fully evaluate the software.

This offer is available subject to availability.
